SUMMARY

Innovative backend developer skilled in Python and Django, dedicated to creating high-performance applications and enhancing user experience through clean code and efficient design.

EXPERIENCE

Thessaloniki Greece
Sep 2023 - Sep 2025

Backend Developer Deloitte

- Developed and maintained RESTful APIs using Django Rest Framework (DRF) for scalable web applications.
- Wrote unit tests with pytest and Django's built-in testing framework to ensure reliability**.
- Led backend development, optimizing database queries and enhancing API performance.
- Integrated and deployed applications on Microsoft Azure, leveraging Azure App Service, Azure Functions, and Azure SQL Database.
- Built and deployed LLM-based applications, integrating OpenAI, Hugging Face, and Azure OpenAI APIs for AI-driven solutions.
- Developed LLM-powered chatbots and automation tools, improving user engagement and operational efficiency.
- Implemented CI/CD pipelines in Azure DevOps, automating testing and deployment.
- Collaborated with cross-functional teams to design scalable microservices and AI-driven solutions.

Remote
Oct 2025 - Oct 2026

Fullstack Developer GuestReady

- Full-stack engineer on a Django 5 / React vacation-rental property management platform serving multiple property-manager tenants, working across models, DRF APIs, React frontends, payments, and integrations.
- Refactored recurring business logic out of views into reusable, testable services (BaseService pattern), reducing duplication across bulk-action and notification flows.
- Implemented automated testing and continuous integration pipelines, boosting deployment efficiency and code quality.

EDUCATION

Kavala, Greece
- Jun 2025

COMPUTER SCIENCE Democritus University of Thrace

SKILLS

- Python
- Django Rest
- Docker
- React
- LLMs
- Celery
- Machine Learning
- Git
- Azure
- .net
- Tailwind CSS

LANGUAGES

Greek
Native

English
Advanced. B2

PROJECTS

"**Video-Creator**" is a full-stack video automation project built with Django REST Framework, Celery, and React. It allows users to generate videos using images, text, and audio with seamless backend processing powered by Celery for task management. The React frontend provides an intuitive interface for video customization, while Django REST handles API interactions efficiently. Perfect for automating video creation with a scalable and modern tech stack. Link : <https://github.com/kostas2370/Video-Creator>
